

CORENA IETP

PRODUCT HIGHLIGHTS

Easy to use, best of class Interactive Electronic Technical Publication solution

- Intelligent, product-specific technical publications that can be tailored to your needs and equipment configuration(s)
- Increases maintenance productivity and throughput
- Supports program requirements for S1000D and ATA iSpec2200
- Features revision highlighting, content filtering, and provides on-demand access to related information
- Fully integrated with CORENA S1000D and CORENA iSpec2200
- Can also run as a standalone tool or can be integrated with other CSDBs

ADVANCED BUILDER AND VIEWER

CORENA IETP is comprised of both a builder and a viewer. The Java-based CORENA IETP builder quickly and easily transforms structured source data (XML) into an interactive electronic technical publication (IETP/IETM).

The CORENA IETP viewer provides a highly functional client runtime framework for viewing these interactive electronic technical publications through any standard web browser.

WELL PROVEN AND FUTURE-PROOF

CORENA IETP provides a feature-rich and well-proven platform that leverages the structure and intelligence in your XML data. Pre-configured to handle S1000D issue 4.0 out of the box, CORENA IETP can also be configured to support older S1000D issues as well as other structured document types such as ATA iSpec2200, 2300, and MIL Specs.

CORENA IETP configuration kits provide access to IETP skins and style sheets allowing you to customize your IETPs according to the specific needs of your program or product.

CORENA offers document management and system integration software for the defense, aerospace, automotive, energy and maritime industries.

CORENA's Commercial-Off-The-Shelf products are highly configurable and allow for the solution to be aligned with your business processes. We offer solutions that handle the entire lifecycle including data input, management, publishing and delivery.

TECHNICAL REQUIREMENTS

STANDALONE MODE

Supported web-browsers for viewing:

- Microsoft Internet Explorer 8 and higher
- Firefox 3.6 and higher
- Google Chrome 4.0

Java support:

- Java 1.6 and higher (on Windows based computers the IETP uses an embedded version of Java so there is no Java prerequisite)

Operating System (OS):

- Windows 7/Vista/XP SP3
- Linux with GTK+ 2.2.1 and higher

HW MINIMUM REQUIREMENTS

STANDALONE MODE

- 32/64 bits Intel 1 GHz Dual CPU
- 512MB (1GB recommended)
- 4GB (Depends on the data amount)

KEY CAPABILITIES

- Many S1000D Issues are supported right out of the box; others can be supported through configuration
- Support for Legacy data (PDF, DOC, Excel, CAD, etc...)
- Integrated with a variety of graphic and multimedia viewers; API can be used to integrate with other viewers as needed
- Thumbnail preview popups of referenced illustrations
- On-the-fly applicability filtering of content
S1000D applicability can be used to filter out non-relevant content. For example, everything can be filtered out except content that applies to a specific aircraft tail number.
- Search engine
CORENA IETP includes a search engine with full text and context-sensitive search capabilities.
- Web based viewer (based on GWT- Google Web Toolkit)
- Standalone mode includes a lightweight relational database

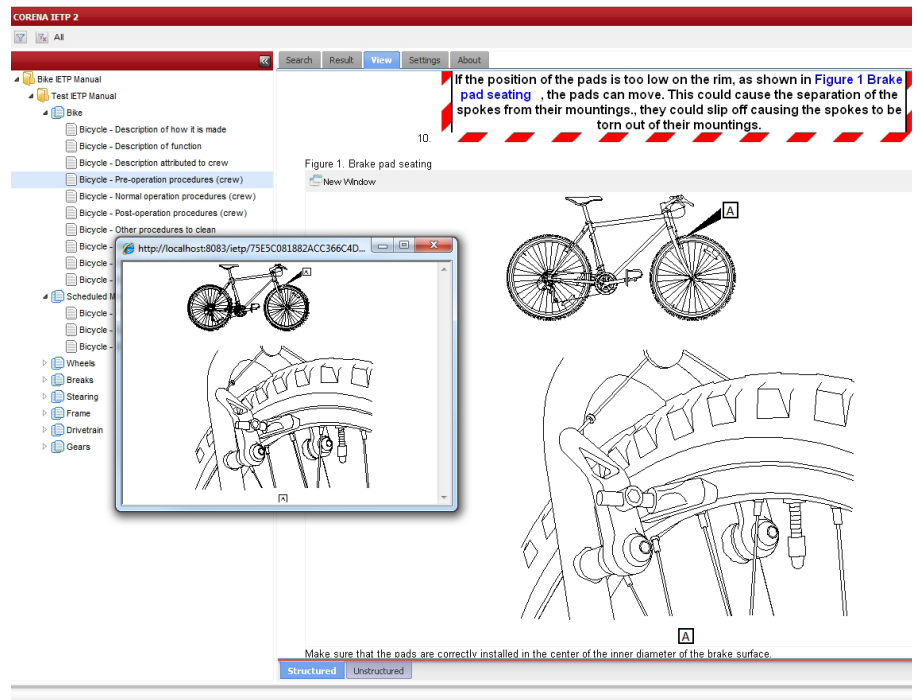

Figure 1
IETP configuration showing navigation and search in separate panels with automatic display of CGM images

- Integration with CORENA S1000D Delivery Suite to easily produce stand-alone IETPs
- XML-based configuration kit for customizing style sheet and skins

- **Rule-based information processing using style sheets for HTML output (e.g. XSLT and CSS)**

Style sheets for electronic distribution are written in XSLT, and include styles for revision marking.

- **Multiplatform support (JAVA 1.6, Spring Framework)**

- **Data loading API allowing customization and support for additional data formats or specifications**
